

STONY PLAIN SUN.

VOLUME ELEVEN.

STONY PLAIN, ALBERTA, THURSDAY, JULY 23, 1931

Whole Number 686

What Does a Gallon Cost You?

What is the cost of a gallon of gasoline in terms of farm products? You can work it out for yourself on the basis of prices at your own shipping point. Here are a few examples, based on the most recent quotations in Stony Plain:

Gasoline sells in Stony Plain at 32½¢ and 33½¢ per Canadian gallon.

Eggs, extra, are quoted at 13¢. To buy a gallon of gasoline you will need more than two dozen and a half.

Special grade churning cream 16¢. You'll need two pounds to buy a gallon.

Wheat, No. 3 Northern, 31¢. Takes more than a bushel to buy a gallon.

Oats, 2CW, 16¢. About two bushels to buy a gallon of gasoline.

Barley, 3CW, 17¢, or 2 bushels to a gallon of Gas.

To fill your tank, how many dozen of eggs, pounds of butterfat, bushels of wheat or oats, do you need, to buy the gasoline?

Plain Carelessness and Brainless Drivers.

Just how serious is the menace of careless motor car driving, even in Western Canada, may be judged by the fact that of the ten leading cases reported in a recent issue of The Western Weekly Reports—forty per cent of all the cases arose out of motor car collisions.

An enormous part of the daily newspaper reports of fatal accidents arise from the same cause. Many causes contribute to this total, but the vast majority of them arise from plain carelessness and brainless drivers.

The speeding cars are usually driven by youths. A demand that the minimum age of drivers be raised to 25 years would not be unreasonable, and would certainly be conducive to public safety.

Hennig-Kulak.

A very pretty wedding was solemnised at the St Matthew Lutheran Church (Mission Synod) on Tues., July 14th, at 4 o'clock, when Miss Olga Elizabeth, second daughter of Mr and Mrs Philip P Kulak, became the bride of the Rev Henry Louis William, son of Mr and Mrs Mike Hennig of Golden Spike.

The ceremony was performed by the Rev J Hennig of Bloomfield, Montana, brother of the groom, assisted by the Rev Emil Eberhardt, in the presence of a large number of relatives and friends.

Mr Mike Hennig, brother of the groom, and Mr Henry Kulak, brother of the bride, attended the Groom.

Miss Minnie Hennig, sister of the groom, and Miss Erna Kulak, cousin of the bride, attended the bride. The bridesmaids wore a flowered chiffon voile.

The bride looked charming in a gown of white georgette and lace with veil.

A delicious wedding dinner was served at the home of the bride's parents. Rev J Hennig acted as toastmaster.

The happy couple, who were the recipients of many beautiful presents, left on a motor trip to Banff. On their return they will take up their residence in Mannville, where the groom is pastor of a Lutheran congregation of the Missouri Synod.

Daniel Brox Sued.

Charging that Daniel Brox called him "a thief, a rogue and a liar," as well as stating that he should be in jail, Mr Ellsworth C McLaughlin, a Spruce Grove farmer, has filed an action for \$950 for slander against his fellow farmer, according to The Edmonton Journal. The plaintiff alleges that the statements were made at the meeting on Monday, June 1st, of the Councillors of Spruce Grove M. D., at Spruce Grove. Mr McLaughlin is at the present time a Councillor in that M. D., and Mr Brox a former Councillor. McLaughlin also seeks a restraining injunction. Mr P G Thomson of Edmonton represented the claimant.

First Returns of the Census.

Reports from the Dominion Bureau of Statistics indicate that the first step in taking the Census of Merchandising and Service establishments has been successful. The census enumerators have secured the names and addresses of merchants in every section of the Dominion.

In August the next step will be taken when a schedule will be mailed to each address taken by the enumerator.

The widespread interest being taken in merchandising census will insure the prompt and accurate completion and return of the Schedules.

'Fresh from the gardens'

Where Are We Astray?

Out of the present world depression good will eventually come. This prediction can be made with absolute confidence and certainty of fulfillment because lessons are being learned and the need for reforms being demonstrated which will force action resulting in the application of remedies.

But at the present moment if the question is asked: What reform is most imperative, what action should be first taken, there are almost as many answers as there are people. There is no agreement as to what has caused world conditions; there is even less agreement as to the course of action necessary to reach solutions and to prevent a recurrence of such depressions. Mankind in its world relationships must have violated some of the fundamental laws of Nature to have brought down upon itself such a world calamity, but, if so, no one appears to be able to put their finger on the spot and declare authoritatively: "There lies the trouble."

All of which leads to the thought, and the question whether our much vaunted systems of education are not very much at fault in the very foundations upon which they are erected. Much thought is expended upon the devising of a curriculum, in the preparation of text books, in the academic training of teachers, and hundreds of millions of dollars are expended in school buildings and equipment of all kinds. This has been going on for generations, yet when a world condition develops such as we are now experiencing, and from which we all suffer, the thinking of the world is confused and muddled. Statesmen, economists, financiers, world leaders in all branches of industry, all are at sea; all running around in circles; all advancing this theory as a solution only to be met by another absolutely contrary theory. No one appears to be standing on solid ground, able to advance a clear or an incontrovertible argument.

What is the basic cause of all this confusion? Is it not to be found in the fact that in our educational methods we have failed to ground our people in a true knowledge and acceptance of the immutable laws of Nature, failed to teach people to think, and to think straight, with the result that the world has been devising and trying out all kinds of artificial man-made devices and experiments, many of them in open defiance of Nature's laws, instead of remaining true to those laws.

Have we not in our educational systems devoted time and energy on many frills; have we not emphasized a narrow, even boastful nationalism; have we not placed a premium on the so-called higher education and the securing of degrees too numerous to mention, but failed to educate men and women to really think, to accurately weigh and rightly gauge the verities of the world in which we live in the full light and knowledge of those laws of Nature, ignorance and violation of which mean suffering, loss and disaster?

To illustrate: Let any two men meet and begin a discussion of present day conditions, and where does the conversation lead them within a few minutes? They begin by discussing wheat, its price, the marketing of it, whether there is over-production or under-consumption, the effect of Russia's "Five-Year-Plan" on Canada and the world, and at once they are attempting a discussion in political economy. Possibly they start by talking ordinary partisan politics, and at once they are into a discussion of tariffs, Protection versus Free Trade, currency and banking, trade treaties, markets—in a word, political economy. Or taxation is the subject. They are agreed it is excessive, but there agreement ends. One man favors this method of raising necessary revenues; the other has directly opposite views. Again it is political economy. Or possibly they begin a discussion of religious creeds or the racial origins, characteristics, and emigration of people—and they land in political economy.

But how many understand political economy which is affecting every nation, every home, every life today? What have our schools really taught us about it? Practically speaking, nothing. It is left as a study for the limited few who reach the higher grades, the colleges and universities, and even then it is an odd one who obtains more than a hazy idea of it.

Notwithstanding this universal ignorance of even the primary principles of the subject, we are today all talking, or attempting to discuss, political economy. The present depression has made it the current topic of conversation, the language of the street, the office and the home. And what do we know about it? How profoundly ignorant we are. And because of this universal ignorance, every quick proposal, every quinine idea, gets a hearing, and in various quarters acceptance as a cure-all for our troubles.

The question presents itself: Should the study of political economy not be made the most fundamental of all studies for the youth of today, commencing early in the lower grades and continuing through our educational system? Let us study the verities of life; above all let us teach and train the young generation along more practical lines, and instead of striving to cram a vast amount of information on certain given subjects into their young minds, ground them in the truth and beauty of Nature and Nature's laws and then train them to think for themselves and apply those laws in every activity of life, individually, nationally, internationally.

Famous Estate For Sale

Glencoe, Lord Strathcona's famous estate in Scotland, is for sale. It covers more than 75 miles, its boundaries stretching 22 miles from Loch Leven to Hannock. Glencoe was the scene of the 1692 massacre, of the Macdonalds. The sentinel rock, from which the signal for the massacre was given, is on the property.

Vancouver Wheat Shipments

Wheat exported from Vancouver for the current crop year will exceed 70,000,000 bushels, according to estimates of the Vancouver Merchants' Exchange. For the present of the 1932 massacre, of the Macdonalds, 672,425 bushels were moved, compared with 43,917,131 bushels for the corresponding period a year ago.

The Mother of Seven Children Used It for Diarrhoea

Mrs. Ray Drinkwater, R.R. No. 2, Hagersville, Ont., writes:—"I am the mother of seven children, and last summer one of them, 17 months old, was taken very sick with diarrhoea, and I thought she was going to die. My husband went 7 miles to see what my sister had given her baby, and he came home with a bottle of Dr. Fowler's Extract of Wild Strawberry. I gave the child a few doses and she was soon well again. My other children also had diarrhoea at that time and I gave them 'Dr. Fowler's' with the same results."

Will Erect Seadromes

Trans-Atlantic Air Lines Soon To Be In Operation

The first of eight seadromes, proposed man-made islands to dot the Atlantic at intervals of 350 miles between the United States and Great Britain, will be constructed off the coast of United States next spring. Captain Hugh Duncan Grant, meteorological consultant to the promoters of the project, announced recently.

Grant, visiting in Akron, Ohio, predicted that within a year from the placing of the first seadrome the other seven ocean landing fields will be completed and a trans-Atlantic air line in operation.

The seadromes, Captain Grant explained, will have a six-acre deck, which will be 70 feet above the water surface, or 30 feet higher than storm waves. The seadromes will be buoyed by air tanks extending 40 feet below the surface. Ballistic tanks, filled with pig iron and giving the seadromes their stability, will extend 177 feet downward.

Australia's New Stamps

Unique Design Commemorates World Flights Of Kingsford-Smith

After some delay Australia has issued the Kingsford-Smith stamps to commemorate his world flights. The set consists of a two pence red, and a three pence blue. There is also a six pence deep mauve, issued for air mail service. Each of the three stamps have the same design, an aeroplane flying between the two hemispheres, with the inscription "Australia" at the top of the stamp, and "Kingsford-Smith's World Flight" at the bottom. The value are in small oval tablets in the lower corner, and the word "postage" at each side. The only difference in the air mail stamp is that instead of the words "postage" on each side, the words "Air Mail Service" are inscribed. When these Commemorative stamps were placed on sale in Melbourne the six penny air mail was bought so heavily, that the supply was exhausted within fifteen minutes.

An Unusual Convention

Four Hundred Divers Of Water Attended Meeting In Italy

Four hundred divers, including professors, physicians, priests, workmen and several women attended the first congress of rhabdomyancy—diving of water, precious metals, etc.—at Verona, Italy, recently. In order to test the divers' capacities, a commission of engineers dug nine holes ten feet deep in the municipal stadium and buried in them metals and pipes containing running water. Armed with rods, willow, or metal, the divers discovered all the spots. Professor Mercati, of the Rome University, declared that he was so sensitive that he was obliged to wear rubber-soled shoes to avoid disturbing sensations when he was walking about.

Persian Balm is irresistible. Fragrant as summer flowers. Cool as a mountain spring. Wonderful for its odor. Softens and whitens the hands. Makes skin soft-textured and youthful. Used by women as a powder base and as a peerless aid to loveliness. Used by men as an effective hair fixative or shaving lotion. And for children, nothing soothes and protects their tender skin like the delicately cool Persian Balm.

Plan Visit To Russia

Visas have been granted by the Soviet Government to George Bernard Shaw, Lady Nancy Astor, and a party of distinguished Britons who have announced their intention to visit Russia this summer.

A Power Of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its use is innumerable and for many years it has been prized as the leading liniment for man and beast.

Credit For Unemployed

Pending the commencement of unemployment relief work on a large scale in British Columbia, the provincial government has instructed government agents and provincial police in all outlying districts to give all persons who need food, credit of 40 cents a day at local stores. The allowance will apply to women as well as men.

Penalty For Nude Parades

Three Years' Imprisonment May Be Imposed Under Proposed Amendment

Three years' imprisonment for parading while nude may be imposed under an amendment to the criminal code which will be introduced in the House of Commons shortly by Hon. Hugh Guthrie, Minister of Justice.

The amendment is proposed with a view to putting a stop to nude parades by Doukhobors of western Canada. It is comprehensive in its character. In the first place it provides a penalty of three years on summary conviction for nude parades. The same penalty may be imposed on anyone found nude in any public place, found nude on private property not their own, or found nude on their own property exposed to public view.

The term "nude" is defined in the amendment as being so scantily clad as to be indecent.

Utilize Muskeg Vegetation

Edmonton Firm Manufactures Building Insulator Material From Muskeg Litter

Commercial utilization of muskeg vegetation, plentiful enough in Northern Alberta, is seen as an immediate probability following the development of a new building insulator called "Mosstex" by two Edmonton men, an Edmonton lumberman, J. Victor Carlson, and his son Arthur V. Carlson, are stated by the Edmonton Journal to have perfected a process by which ordinary muskeg litter is transformed into fine quality of insulation material. Experimental work is stated to have advanced sufficiently for the new product to be offered to the building trade.

Remove all callouses and enlargements from your stock with Douglas' Egyptian Liniment, a wonderful remedy.

Willing To Oblige

A Philadelphia man called up a birdstore the other day and said: "Send me 30,000 cockroaches at once."

"What in heaven's name do you want with 30,000 cockroaches?"

"Well," replied the householder, "I am moving today and my lease says I must leave the premises here in exactly the same condition in which I found them."

British Trade With Russia

Export Credit To Be Extended For A Period Of 30 Months

In a move to increase British exports to Soviet Russia, the British Government announced Thursday, July 9, 1931, through William Graham, president of the Board of Trade, that export credit will be extended for a period of 30 months instead of 24 months as at present.

This arrangement will be limited to heavy engineering products.

The British move has resulted from other European countries, notably Italy, having extended their export credit schemes for Russia to 30 months.

The announcement, made in the House of Commons, disposes of reports in the British press in the last few days that the Labor Government planned to extend a new credit of approximately \$30,000,000 to Russia. It was learned authoritatively that British export credit arrangements for Russia remain unchanged, except in relation to the extension of time limit. The 30-month limit includes the period of manufacture.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

A Live Stock Safeguard

Restrictions Placed On Importation Of Stock From Countries Infected With Foot and Mouth Disease

With official confirmation of outbreaks of the dread foot and mouth disease in England, Scotland and Ireland, it has become necessary for the Dominion Department of Agriculture to exercise the powers conferred upon it under and by virtue of the Animal Contagious Diseases Act, and cancel all permits issued for the importation of cattle, sheep, goats, and other ruminants, and swine from the countries infected with foot and mouth disease. While shipments actually embarked as on the date of the official order, June 20, 1931, will be allowed to proceed to Canadian ports, the issue of permits has been held up for an indefinite period.

Brief Outline Of Regulations Governing The Admittance Of Tourists To Canada

An outline of Canadian regulations governing admittance of tourists may be of timely interest. A non-resident, visiting Canada for purposes of touring permit for his automobile for health or pleasure, may obtain a period not exceeding sixty days without bond, which may be extended for another thirty days on making application to any Collector or Sub-Collector of National Revenue, and satisfying him as to the bona fides of the applicant as a tourist. If the visitor desires to extend the period to six months he may do so by giving a bond.

Under revised regulations guns, rifles, fishing tackle, golf clubs, cameras, etc., previously used by a tourist, and brought in for his personal use and actually in his possession at the time of his arrival in Canada, together with dogs and other animals imported for hunting purposes or as pets, are admitted without deposit, the only requirement being that they should be reported at Customs on arrival at the frontier, in accordance with the regulations.

The term "camera" includes not only still picture cameras, but motion picture outfits, the property of bona fide tourists, brought in for their own use for a temporary period, and not for any business or commercial purpose.

Canoes, outdoor motors, tents, camp equipment, photographs, radios, musical instruments, etc., brought in for a tourist's personal use, and not for gain or hire, are admissible upon a sum being deposited equivalent to the duty and taxes payable on the goods, each deposit being subject to refund upon identification and exportation of the articles under Customs supervision within six months from time of entry.

"Statements circulated in the United States that servants of American tourists and visitors to Canada are not being allowed to enter the Dominion this year are absolutely untrue," states Hon. W. A. Gordon, Canadian Minister of Immigration and Colonization. "American tourists and visitors have always been allowed to bring their servants into Canada and they may continue to do so. The only persons likely to find any difficulty in crossing the International Boundary are aliens who are in the United States illegally or in that country under temporary status, as the question of their readmission to the United States would arise, should they try to return there."

Hon. Mr. Gordon said that Canada extends a cordial welcome to bona fide United States citizens coming to Canada as visitors and tourists, and Canadian Immigration officials at International Boundary points are instructed to facilitate their entry to the Dominion.

A Fallacious Opinion

The St. Thomas Times-Journal recently published a timely editorial pointing to the fallacious opinion held by so many people that the best of surgical attention and nursing care is found only in the largest cities of the continent. The St. Thomas paper puts in a word for the smaller hospitals like those in its own city, and also gives credit to the surgeons who are doing just as fine a work in their own small communities, as are the men of great reputations in the metropolitan centres.

"I have known you such a long time, and this is the first time you have ever danced with me."
"Yes. It is I, and I am denying myself pleasure," Moustique Charlier.

W. N. U. 1599

Ridiculed For Using Ancient Wooden Plough

But Farmers In Sussex, England, Know What They Are About

Although ploughs, like other agricultural implements, have been subject to many alterations and improvements in the course of centuries, it is remarkable at least that in some parts of England the most popular pattern of plough is still one which can differ but little in its general character from the very first implement of the kind that was ever invented. In Sussex and Kent, England, the old wheelless, turn-wrist plough is still very much in favour, and there is a very good reason for its popularity. On heavy land any sort of wheel except that of a wide and necessary cumbersome type cannot be of much service because it tends to dig into the ground when the soil is wet and causes the plough to "jump" when the surface is hard and dry. Sussex ploughs of this kind are invariably made of wood, there being practically no iron about them except the shoe on the tip of the share and the necessary nuts and bolts. The wooden share has the advantage on heavy land that it does not smear out the soil in the furrow like a wholly iron share, but tends to break it up. The Sussex farmer has often been held up to ridicule for his persistence in retaining the wooden plough; but we may take it that he knows what he is about.

Empire Marketing Is Becoming More Popular

Annual Report Of Board Shows Trade Is Increasing

The world-wide economic depression has not arrested the growing habit in the United Kingdom of buying within the Empire. The annual report of the Empire Marketing Board reveals that apples from Canada and New Zealand reached a record quantity in the past year, those from Canada exceeding two million hundredweight, against a previous record of 1,869,000 hundredweight in 1923. In 1930, 64,000 hundredweight of Canadian pears were imported as compared with 60,000 in 1928.

Parliament has been asked to provide \$3,285,000 for the board's activities during the coming 12 months. The policy of making grants for scientific research work both here and abroad is being continued. Among grants already made are sums for the University of British Columbia for research on cheese ripening and research on the cost of transport of pedigree livestock; to the Ontario Agricultural College at Guelph in connection with egg production; and to the Newfoundland Government for fishery research.

"My husband and I attend to our budget every evening. It is more economical."

"How so, dear?"
"By the time we get it balanced it is too late to go anywhere."

A fire engine of German invention pumps streams of carbonic acid powder that smother flames instead of using water.

(By Annotto)

CAPE LENTS CHARM AND YOUTHFULNESS

You'll like this slender model immensely. It's a lovely patterned crepe silk in smart red and white colouring. The low placement of the circular skirt bounce joined to the upper part of the dress in diagonal outline gives the figure a charming lengthened line. The narrow tie-belt holds the dress snugly to the figure at the natural waistline. Being adjustable, it may be worn at a point as best suits its wearer.

The miniature view shows how utterly chic it is with cape collar.

Lovely fabrics for its development are chiffon prints, pastel flat washable crepe, shirring silks, cotton mesh, and linen.

Style No. 829 is designed for sizes 14, 16, 18, 20 years, 38, 40 and 42 inches bust. The 36-inch size requires 3 1/2 yards of 38-inch material with 2 1/2 yards of ruffling.

Price of pattern 25 cents in stamps or coin (coin preferred). Wrap coin carefully.

Prince Has New Sport

The Prince of Wales has taken up a new sport—motorboating. He has ordered two new racing boats, but the manufacturer of the craft said the prince will not contest in open races but probably will organize competition among his flying and motoring friends.

Steamship Beothic Is Again Starting On Annual Trip To Posts In Arctic Archipelago

Work Up To Schedule

Churchill Will Be Ready For Grain Shipments This Fall

Preparations are going along satisfactorily for the trial shipments of grain this fall out of Churchill.

The ice-breaker N. B. McLean, left Quebec recently to take up her duties along the route and the work on the port facilities is well up to schedule.

No official announcement has yet been made as to the terms under which the test shipments carrying between 500,000 and 750,000 bushels of wheat will be made.

The understanding is, however, that because of the route being now, the insurance rates consequently high, and the trips being of a special nature as far as the ships participating are concerned, the charges per bushel in the ordinary course would be somewhat higher than via Montreal.

The government, it is expected, will be prepared to assume the additional costs for these shipments so that it will not cost the shipper any more than the Montreal route.

Consideration is being given, according to reports, as to who will be the shippers. Some companies with trademarked wheat products are said to have applied for permission to ship the first wheat by the port, but that the government does not take kindly to the trials being used to advertise any particular company. So far, according to reports here, none of the big shippers or the pools has made a decision in the matter.

The insurance rates announced from Regina, are the same as those made public by the Department of Marine in May. Hopes are expressed that after the trial shipments have been made and there is more tangible evidence to go before the shipping commission with, lower insurance rates will be obtained.

Good Canned Goods

Government Commercial Inspection Service Ensures Uniform Quality

Summer is the season in which the camper and tourist hold away through the length and breadth of the land. It is also the time of the year when, perhaps more than at any other, canned goods are in demand. It is during this season that the traveling and camping public come to realize the true worth to them of the commercial inspection service supplied by the Fruit Branch of the Dominion Department of Agriculture. Under this service all canned products of fruit, orchard and farm are put up under close inspection, and each individual container in addition to conforming with a specific size must be clearly marked with the true quality of the product it contains. There are three grades of quality defined by statute. These are—"Fancy" which is the highest grade and as nearly perfect as possible; "Choice" which, while not quite so perfect in appearance, is, as the term implies, a real good quality for the product; and "Standard," for use where appearance is not the principal consideration, and which provides high food value and good flavour at little cost.

Another good thing about radio concerts is the lack of encores.

The S.S. Beothic carrying the Department of the Interior's 1931 expedition to the posts in the Arctic Archipelago will sail from North Sydney, Nova Scotia, on July 29. The date of this year's sailing is practically the same as last year and from experience it has proved the most satisfactory for the carrying out of the work of the patrol.

This year's expedition by officers of the North West Territories and Yukon Branch will be in charge of Major L. T. Burwash, an Arctic explorer of long and wide experience. Captain E. Falk will again be ship's master while Captain J. D. Morin will be the ice pilot. Dr. L. D. Livingston, Medical Health Officer of the Branch will be ship's doctor on the voyage as far as Pangnirtung, where he will replace Dr. H. A. Stuart, who has completed a two year period among the natives of Baffin Island. Dr. Stuart will act as ship's doctor on the return voyage.

Inspector A. H. Joy and four constables of the Royal Canadian Mounted Police will accompany the expedition to effect changes in the personnel at the posts visited. Members of the force who have completed their tour of duty will be relieved. Two of the constables going North will remain at Pond Inlet at the northern end of Baffin Island; another will relieve one of the two stationed at Beechey Peninsula, Ellesmere Island; and the other will replace a constable coming out from Lake Harbour, southern Baffin Island.

The same itinerary as last year will be followed, with the first call being made at Godhavn, Greenland. The "Beothic" will then be headed north along the Greenland coast for the farthest north post of Beechey Peninsula on Ellesmere Island. By following this route much time is saved and the dangerous middle ice pack of Baffin Bay is avoided.

On the return trip the first stop will be made at Dundas Harbour, Devon Island. Although not yet definitely decided, it is possible that after completing the work at this post, the "Beothic" will return westward into Lancaster Sound to again attempt to reach Winter Harbour, Melville Island. In the event the cache established at that point by the 1908-09 expedition. Last year heavy ice conditions prevented the "Beothic" from reaching Winter Harbour. If it is decided to make this patrol, caches will be laid down at Beechey Island off the southwest corner of Devon Island, and at Cape Cockburn, Bathurst Island. These will be for the use of Royal Canadian Mounted Police patrols and others travelling in the area.

Returning eastward to Baffin Bay, the ship will call at Pond Inlet, River Clyde, Pangnirtung, and Lake Harbour, Baffin Island; Chesterfield, Hudson Bay; and Port Burwell, Hudson Strait. The work of re-provisioning the posts and effecting changes in the personnel will then have been completed and the "Beothic" will turn southward for the final leg back to North Sydney.

B.C. Eggs For England

A shipment of three thousand cases of thirty dozen each of British Columbia eggs were shipped recently from New Westminster to London, England, by the British Columbia egg pool. This is the first export shipment of eggs since 1929. It will be the first of several shipments this year. Prices in the Old Country are said to be fair.

"How much is that canary?"
"Two pence!"
"Can't you let me have it cheaper?"
"No, madam. This is factory price!"—Buen Humor, Madrid.

PERFORMS UNUSUALLY WELL AT ROYAL AIR FORCE PAGEANT

The Royal Air Force Pageant produced annually by Britain's fighting air force, once again proved a great success and was a feast of thrills for the hundred thousand spectators. This picture shows the queer, fish-like "Pterofactyl," one of the quaint machines which took part in the Pageant. It has a speed of 110 miles an hour, carries three passengers, has no tail, and has the engine and propellers behind the pilot. One of its best qualities is that it is foolproof.

Summer COLDS

Almost everybody knows how Aspirin tablets break up a cold—but why not prevent it? Take a tablet or two when you first feel the cold coming on. Spare yourself the discomfort of a summer cold. Read the proven directions in every package for headaches, pain, etc.

Made in Canada

WORLD HAPPENINGS BRIEFLY TOLD

Eight Russian army officers were killed in an airplane accident near Alaska, 30 miles west of Moscow. Edmonton land sales for the first quarter this year amounted to \$15,000 more than for the same period last year.

In Parliament Prime Minister Bennett said he did not expect to hold the position of Finance Minister at the next session.

Air mail contracts of which expiry notices on July 15 were issued by the post office department several weeks ago, have been extended until August 15.

Charles A. Lindbergh has been granted permission by the radio commission to operate a transmitter aboard his airplane on his projected flight to Japan.

Jute factories in Dundee, Scotland, are at work making a million sugar sacks. The sacks have been ordered by the government and are to be completed by December.

Organization of self-contained labor camps in the north of Canada was proposed in a resolution passed at Hamilton by the central branch of the Canadian Legion.

Announcement is made of the appointment of Lieut.-Gen. Arthur G. Wauchop to be high commissioner in Palestine, succeeding Sir John Chancellor, who recently resigned.

Appointment of H. E. Beresford as assistant director of surveys for Manitoba and Alfred Bedford Howell as chief game guardian have been officially announced by order-in-council of the provincial government of Manitoba.

Strange News From Holy Land

32,000 Horse-Power Plant To Supply Electrical Energy In Biblical Towns

Here is strange news from the Holy Land. The first hydro-electric plant on the River Jordan south of the Sea of Galilee will soon be in operation. It was built partly by American capital and by next year its 32,000 horsepower plant will be supplying current to such Biblical towns as Jaffa, Haifa, Nazareth and Beersheba. Meanwhile the British are building a generating plant that will supply Jerusalem, Bethlehem and the surrounding region. Before long the mountain streams of Lebanon will be producing 51,000 horsepower.—World's Work.

A portable X-ray has been designed to enable a physician to learn at once the extent of a patient's injuries who has been hurt in an accident. The machine is carried to the scene in the ambulance.

"We will be married on Saturday." "Impossible. I am playing football that day."—Wren Humer, Madrid.

SUNDAY SCHOOL LESSON

JULY 26

CHRISTIANITY SPREAD BY PERSECUTION

Golden Text: "Be thou faithful unto death, and I will give thee the crown of life."—Revelation 2:10.
Lesson: Acts 7:54 to 8:4; 11:19-21; 26:11-1; 1 Peter 4:12-19.
Devotional Reading: 1 Peter 1:3-9.

Explanations and Comments

The First Christian Martyr, 7:54-60; 8:2.—How challenging is the fortitude and grace of Stephen! In the strength of his vision of the heavens opened and of the Son of Man standing on the right hand of God, he could meet hatred and even death with a serene and courageous spirit. How his quiet demeanour contrasts with the ruthlessness and hatred of the mob, who grind their teeth in fury, scream, rush upon him, drag him without the city walls, and stone him.

When the stoning began, Stephen knelt to pray for those who stoned him to endure to the end, or it may be as the stones hurtled upon him he was thrown to his knees and was in this position as he prayed. As the stones came thick and fast, like his Master he prayed for those who stoned him. "Lord, lay not this sin to their charge," he cried; do not weigh, place not this sin in their balance against them. At once, we think of Christ's prayer from the cross, "Father, forgive them, for they know not what they do."

In our lives we need Stephen's steadfast courage, and his clear-eyed faith, and his heaven-piercing hope, and his God-like charity.

Paul's Part In Stephen's Death, Acts 8:1.—When witnesses to the stoning of Stephen laid aside their flowing robes in order to have freer liberty of action, they left them in the care of a young man named Saul. He is first called Paul in Acts 13:9. And Saul was consenting unto his death, approving all that was done in Acts 22:20. "Paul himself says, 'When and the blood of Stephen, Thy witness, was shed, I also was standing by and consenting.'"

Persecution Begins and the Disciples Are Driven Beyond Jerusalem, Acts 8:1, 2.—Not content with Stephen's death, the mob began a city-wide persecution of the church which was in Jerusalem, and they were all scattered abroad throughout the region of Judea and Samaria. Nearly six years had elapsed since Jesus commissioned His disciples to go and teach all nations, yet the church was still in Jerusalem, and not a single Gentile had been invited into the church.

Paul's Share In The Persecution, Acts 8:3.—"Consenting" today, standing by while others stoned Stephen, presently, when the attempt to destroy the church became a settled policy to be systematically carried out, Paul enlisted in the task and with fury and zeal entered into every home and dragging from it men and women committed them to prison.

The Scattered Christians Preach Everywhere, Acts 8:4.—The attempt to extinguish a great fire by kicking the embers apart resulted in a new fire blazing up where each ember fell. Hitherto the apostles had done the preaching. At the time of the appointment of the seven, the apostles had declared "we will give ourselves continually to the ministry of the word." But all the Jews scattered by persecution went everywhere preaching the word. They probably did not declare the truth at first in any set form. Simpson says, they went "gossiping the gospel." As they sought shelter in the villages and towns, in explaining why they were there, they would tell the story of the gospel. This brought to the surface latent talent and those gifted began more formal preaching. In this way, the preaching of the truth ceased to be exclusively an apostolic function.

Communicating With Planets

Nicola Tesla Discovers Means Of Transmitting Energy From One Planet To Another

Nicola Tesla, the inventor, in an interview on his 76th birthday, said after years of research he had discovered a means of transmitting thousands of horsepower of energy from one planet to another, which he believes will open the way for inter-planetary communication. "I feel," he said, "that we are nearing a period when the human mind will perform greater wonders than ever before. This is due to the continuous refinement of means and methods of observations and the ever increasing delicacy of perception."

"Keep hold of the cord of laughter's bell, And avoid the tones that jar; The sound of a sigh doesn't carry well, But the lift of a laugh rings far."

Passing Of Trader Moberley

Was Link With the Very Early History Of the West

H. J. Moberley, better known as "Trader Moberley," is dead. Apparently in good health, Mr. Moberley was walking about a few days ago. The end came after a very brief illness, death being attributed to old age, Mr. Moberley being 96 years of age at the time of his death.

Known internationally for his book, "When Fur Was King," Mr. Moberley is believed to have been the only remaining commissioned officer of the old Hudson's Bay Company. He served the company from 1854, when he came west with Sir George Simpson, then governor of the company, till his retirement in 1894, when he was factor at Ile a la Crosse Post.

Born in Barrie, Ontario, Mr. Moberley was the son of a noted captain in the British navy. His father fought in the war of 1812. Prior to joining the Hudson's Bay Company, Mr. Moberley was employed by the famous British firm of Lloyds and in their service he visited Havana, Cuba, and St. Petersburg, Russia.

He commenced his service with the Hudson's Bay Company as clerk at Norway House under Chief Factor Rowland. Edmonton was his first post and afterwards he was moved to Rocky Mountain Post, later opening up Jasper House as a trading post for his company.

He also at one time was in charge of the posts at Fort Vermilion and Peace River, and established the Fort McMurray post in the early '70s. He was in charge of transports at Portage la Pêche and carried despatches ahead of the Earl of Southesk in 1859 when the earl engaged in a hunting trip through Canada. Prior to taking charge of the Ile a la Crosse Post, the veteran trader was stationed at Stanley Mission on the Churchill in northern Saskatchewan.

Houses Good Sized City

Thousands Work Or Live In Empire State Building, New York

One of the biggest houses in the evergrowing world is the Empire State Building of New York. It is a huge structure of steel and bricks and is 86 stories high. About 25,000 people live or work in it. There are 58 passenger lifts for the 86 stories and three kinds of express lifts. Some of these lifts run at a speed of 15 miles an hour. The passenger goes up to the nearest stopping floor to his and then transfers to a slow lift which stops at every floor. Here again, however, he can make the last part of his journey on an escalator, of which there are nearly a hundred. Six lifts entirely for goods are always in busy use.

Film Actor: Look here, if he's going to throw me into the rapids, how am I going to get out?" Director: "Oh, that's all right. You don't appear again!"—The London Opinion, England.

Recipes For This Week

(By Betty Barclay)

LEMON EGG-NOG

(Serves 1)
6 tablespoons milk.
½ cup cold water.
1 egg.
2 tablespoons sugar.
2 tablespoons lemon juice.
Grated nutmeg.
Combine milk, water, egg and sugar. Beat thoroughly, pour in lemon juice and mix vigorously. Serve in a large glass topped with a grating of nutmeg.

HONGKONG CHICKEN

2 cups cold cooked chicken, diced.
½ cup celery, diced.
2 onions, sliced.
½ cup crushed pineapple, drained.
1 teaspoon sugar.
Salt and pepper.
1 tablespoon butter.
Brown the celery and onions in the butter. Add the other ingredients. Heat well. Serve with fried noodles.

Manitoba Gold

Province Likely To Replace Yukon As Fourth Producer In Canada

Gold production in Manitoba for the first four months of the year exceeded the total output for 1930 by a substantial amount, and at the present rate of production the province is likely to replace the Yukon as the fourth producer in all Canada. Manitoba's gold output for the first four months of 1931 amounted to 35,928 ounces valued at \$739,540, or at a rate well in excess of two million dollars annually, as compared with an output of 23,189 ounces valued at \$479,359 for the whole of 1930.

Funds For Alberta

Settlement Of School Lands Case Is Satisfactory To Province

Close to ten million dollars in provincial assets, with nearly a half million a year in interest for three years, will be coming to Alberta as a result of the settlement of the school lands funds case. Hon. R. G. Reid, provincial treasurer, has been advised from Ottawa that the Dominion Government has issued a three-year debenture for \$9,564,569, bearing interest at 5 per cent, until July 1, 1934, payable half-yearly.

The debentures thus issued to Alberta's credit represents accumulated principal moneys from the sale of school lands since the organization of the province in 1905. All funds from this source have heretofore been handled by the Dominion, which has retained the principal and paid interest to the province. With the transfer of the "Natural Resources" from Dominion to Provincial control the school lands funds now pass to the province as part of the public domain. Negotiations leading up to this settlement have been under way for a considerable time past. The conclusion now reached is regarded as highly advantageous to the province, and both Premier Brownlee and Treasurer Reid express themselves as well pleased with the outcome.

Worked In a Circle

Teacher—"Why are days longer in summer than in winter?" Tommy—"Because the sun shines longer." Teacher—"Yes, but why does the sun shine longer?" Tommy—"Because the night is so much shorter."

Baseball is popular in Argentina this year.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CUT DOWN YOUR LOSSES BY INSTALLING WINDOLITE

Canadian breeders of poultry and livestock are finding Windolite a most satisfactory and profitable investment. Young chickens and turkeys are entirely free from leg weakness and disease and will thrive in confinement under Windolite. Windolite comes in rolls any length, but 36 inches wide only.

Distributors: CHANTLER & CHANTLER LIMITED
51 Wellington St. W. TORONTO, ONT.

USE WINDOLITE IN BROODER HOUSES LAYING PENS DAIRY BARN SUNROOMS ETC.

PROPOSED PROBE OF QUESTION OF TRANSPORTATION

Ottawa, Ont.—Recommendations for appointment of a commission to consider the whole question of general transportation; present curtailment of projects entailing capital expenditure; salaries of Sir Henry Thornton to be treated as a "public document" and non-publication of the list of other salaries paid officials are recommended in an unanimous report of the special committee of the House of Commons considering the Canadian National Railway's report.

The document further recommends revision of the resolution of former C.N.R. directors for \$30,000 line annuity to Sir Henry Thornton on termination of services; consideration by directors of the whole question of salaries, allowances, disbursements, pensions and retirement provisions for executive officers. The abandonment of Canadian Government Merchant Marine and the making of arrangements with other shipping companies so that external trade of Canada will not be jeopardized are also proposed.

The report condemns a practice that it declares has grown up under which the National Railways are chargeable with large amounts for payment for social entertainment and other activities of officials on other than official business.

Further recommendations include: Continuation of payments under the Maritime Freight Rates act; thorough audit by independent auditor of system accounts from time to time; action for elimination of losses on Vancouver-Seattle-Victoria steamship triangular service; approval of bill to authorize expenditures made and indebtedness incurred during 1931, and approval of measure to authorize the guarantee of securities to be issued under the Canadian National Railway Financial Act, 1931.

Want Potato Probe

Inquiry Into Conditions Under Which B.C. Potatoes Were Marketed

Ottawa, B.C.—Federal inquiry into conditions under which British Columbia early potatoes were marketed at prairie points, at widely different prices far above the return received by the interior and coast producers was asked by Hon. William Lyon Mackenzie King, Minister of Agriculture, acting on the complaint of the Vernon Fruit Union and other B.C. growers.

The provincial minister of agriculture wired to Mr. Gormall, chief of markets extension, to make a general department, citing the "apparent unwarranted spread" between what producers of the province received for their early potatoes, and the wholesale prices as recorded in the bureau's report No. 3, dated July 3, for quotations at many prairie points.

Post Office Deficit

Due To The General Depression Says Postmaster-General

Ottawa, Ont.—The post office deficit was due to the general conditions in the country, Hon. Arthur Sauve, postmaster-general, told the House of Commons when, in committee of supply they considered the estimates of his department. The vote of \$11,492,899 for salaries, etc., was passed. For the fiscal year just closed the deficit of the department, would approximate \$5,293,000, being the difference between expenditures of \$36,293,680, and revenues totalling in the neighborhood of \$31,000,000.

Advocate Group Insurance

Victoria, B.C.—Group insurance for all civil servants of Canada to be embraced in a national policy, will be placed before the annual all Canada Civil Service Convention at Regina in September, by the Victoria and Vancouver branches. It was made clear at a meeting here of the Victoria local of the Amalgamated Civil Servants of Canada.

Government Grain Elevator

The Dominion Government grain elevator, under construction at Lethbridge, is expected to be ready for business by September 1st, this year.

W. N. U. 1999

Government Buying Wheat

To Be Ground Into Flour For Drought Areas In West

Ottawa, Ont.—The Dominion Government has decided to direct the purchase of 2,000,000 bushels of wheat to be ground into 450,000 barrels of flour which will be available at low price with bran and shorts, in drought areas in western Canada. Premier Bennett announced in the House of Commons.

"It is not improbable," the prime minister stated, "that members, especially those who reside in western Canada, may be interested in knowing that the government has concluded in view of the situation that obtains, to direct the purchase of 2,000,000 bushels of wheat, which will be ground into flour by the mills of the west, thereby enabling the municipalities and those requiring assistance to obtain flour at a very reasonable price and where distribution has to be made we will be in a position to do so without delay."

"That will produce 450,000 barrels of flour and the bran and shorts that will remain will also be available if desired. I mention this at once in order that members who may be receiving communications from the west may be able to reassure those who are directly affected by the drought conditions in their provinces."

To Commemorate New Treaty With Australia

B.C. Will Send Giant Douglas Fir Flag Pole To Canberra

Victoria, B.C.—Jubilant at the completion of the new Canadian-Australian preferential trade treaty, Premier Tominie has ordered that this province's gift to Australia of a giant Douglas fir flag-pole be sent to Canberra immediately.

Government foresters will search in the woods of this province for a tree of perfect shape and great height and will supervise its cutting and seasoning. Standing in the grounds of the Australian capital, with a suitable bronze tablet at its base, the pole will commemorate the successful new treaty of the new treaty, which Premier Tominie described as the best business this province has received in years.

Newspaper Man Honored

J. F. Burd, Of Vancouver Province, Presented With Oil Painting

Vancouver, B.C.—Presentation of an oil painting of himself was recently made to J. F. Burd, managing director of the Vancouver Daily Province, by executives of the newspaper who had been associated with the Province for 20 years or longer.

Lured to a dinner party on the pretext that the function was to welcome John Russell, business manager, to the 20-year circle, Mr. Burd was surprised to learn that he was the guest of honor.

Presentation of the painting was made by Roy W. Brown, editor. Others present were Ronald Kenyon, managing editor; W. C. Russell, advertising manager; F. E. Henderson, circulation manager; D. A. McGregor, editorial writer, and John W. Wright, production manager.

Hospital Commission

Proposed Network Of Cottage Hospitals and Clinics For Manitoba

Winnipeg, Man.—Establishment of a provincial hospital commission with wide powers and division of the province into hospital zones was held to be essential by a select committee of the Manitoba legislature which met here. The committee was appointed at the last session of the House to work out a means of "more equitably distributing the cost of illness."

Hospitals are unevenly distributed in the province, the committee decided. Members agreed that a network of cottage hospitals and clinics was necessary to supplement the municipal hospitals. The committee will meet here again in August.

Ore Contains Silver

Edmonton, Alberta.—The mystery ore recently discovered by T. G. Dodson, Detroit geophysicist, at Great Bear Lake, contains silver, it has been announced. The sample tested by University of Alberta experts was declared to be of almost unbelievable richness, assaying \$1,035.35 to the ton.

FOR UNEMPLOYMENT RELIEF

Hon. J. A. Merkle, Minister of Railways, Labor and Industries in the Saskatchewan Cabinet, who seeks \$15,000,000 from the Dominion Government to take care of the relief and unemployment in Saskatchewan this year.

Premier Introduces Bill For Pensions

Resolution Provides For Increased Contribution By Federal Government

Ottawa, Ont.—A resolution providing for the increase from 50 to 75 per cent. in the federal contribution to old age pensions has been placed on the order paper of the House of Commons by Rt. Hon. R. B. Bennett, Prime Minister. The resolution calls for an amendment to the Old Age Pensions Act. It reads as follows:

"Resolved, that it is expedient to amend the Old Age Pensions Act by increasing the amount of the payment to the provinces for old age pensions from one-half to 75 per cent. of the net sum paid out during the preceding quarter by such province for pensions, and to provide for the examination and audit of expenditures in the province and the accounts relating thereto."

The increase in federal payment for old age pensions was announced some time ago. This legislation implements that announcement.

Trans-Canada Flight

First Non-Stop Flight From Halifax To Vancouver To Be Attempted In August

Vancouver, B.C.—The first non-stop flight across Canada, from Halifax to Vancouver, will be attempted August 14 by J. Williams, of Ottawa, in the course of a triangle flight, Vancouver, Mexico City and back to Halifax, according to a telegram received by Airport Manager William Templeton.

Williams will fly a Lockheed Vega monoplane, capable of a speed of 170 miles per hour. He will leave Halifax at dawn and expects to reach Vancouver about 7 or 8 o'clock in the evening. He will return here and take off immediately for Mexico City, hoping on again from that point for Halifax. He hopes to make the 9,000 mile round trip in three days.

Riding Freight Trains

Railway Officials Take Action To Put A Stop To Free Trips

Vancouver, B.C.—Frequent deaths among travellers getting free trips on freight trains, has been responsible for a drive to end this form of travel, according to railway officials. It is unofficially stated that there have been scores of such deaths in the past few months. Sudden shifting of lumber loads and many other eventualities contribute to the toll among the brake rod riders.

This week Canadian Pacific Railway police, co-operating with other forces, started a campaign and there have been 20 arrests in various parts of British Columbia for this kind of trespassing.

Another object is to stop indiscriminate movement of unemployed from one part of the country to the other. Railway officials state, too, that many of the travellers are able to pay fare.

Travellers have been used to an average number of casual trips seeking free transportation, but the new tide of traffic has swelled to great proportions and has become unwieldy with impediments. In fact, so much baggage has been piled on top of freight cars that brakemen have difficulty, it is said, in making their way along the catwalks.

Pleased With Treaty

Australia Satisfied With Terms Of Recent Trade Pact

Melbourne, Australia.—General satisfaction is being expressed here at the terms of the new Australia-Canadian trade treaty.

It is stated the Canadian concession for Australian wines and citrus fruits will stimulate exports to Canada from this country, and provide a valuable market which will give Australia practically a monopoly in currants and raisins.

"Butter exporters have every reason to be satisfied," said the chairman of the Victorian section of the Australian dairy produce export board.

The S.S. Canadian Constructor leaves for Montreal at the end of August and is expected to take more than 200,000 cases of dried fruits. Every effort is being made to load this ship with a representative Australian cargo.

British Boys Entering Canadian Universities

At Least Twenty-One Are Coming This Year

Montreal, Que.—Practical results of the visit to this country last spring of a group of British public school headmasters is seen in the announcement that at least 21 British public school boys will come to Canada this year to enter Canadian universities. McGill University will have 12 of the boys, Queen's University, four, University of Toronto, three, and one each will go to Guelph and the University of British Columbia.

F. R. W. Crump, Taunton, will study chemistry at British Columbia.

MANITOBA PLANS TO RELIEVE THE FEED SITUATION

Winnipeg, Man.—Reduction of permit fees on hay on crown lands from \$1 to 25 cents per ton and measures of co-operation with Saskatchewan will form part of Manitoba government's policy regarding the feed situation. In making this announcement Premier John Bracken stated the feed situation has shown "decided improvement" during the past three weeks.

The premier said there was "much greater promise" at present for fall pasture and winter feed, but there is still a shortage in some districts. On crown lands, he said, there were 25,000 tons over and above the amount already permitted to resident settlers. As a result of a conference with heads of railway companies, hay will be transported to needy areas at two-thirds of the ordinary freight rate.

The lower rate was secured on the understanding the government would become responsible for the payment of reduced charges. "It is now proposed," Premier Bracken continued, "that the provincial government, in conjunction with the Dominion Government and municipalities, absorb the two-thirds rate, making hay available in drought areas free of transportation costs except as may be charged farmers by municipalities."

Premier Bracken explained that this move was purely a relief measure to maintain the livestock industry and he thought it may occur that municipalities in parts of the southwest of Manitoba will not have to bear serious expense. As a source of relief to unemployed in the Carrot River Valley of Manitoba, the government had decided to put up 1,000 tons of hay at once and invite both Saskatchewan and Dominion government to contribute for their requirements for drought areas of Saskatchewan.

Request For Wheat Board Is Refused

Prairie Premiers Advised Of Decision Reached By Government

Winnipeg, Man.—The Dominion Government has turned down the request of the prairie premiers for a wheat board. Premier John Bracken of Manitoba, disclosed that the premiers had received a letter from Premier R. B. Bennett advising that the Canadian Government does not see its way clear to set up the proposed prairie-wide board.

The letter from Mr. Bennett, Mr. Bracken admitted on questioning, made the suggestion of an "inter-provincial body" somewhat similar to that forecast in reports published here. It had been reported that the Ottawa suggestion was for a commission, headed by John I. McFarland, head of the Fools' Central Selling Agency, to control the local elevator systems and to market their grain.

Deportation Figures

3,000 Britishers Deported From Canada In Ten Months

Ottawa, Ont.—Deportations from Canada from August 1, 1930, to May 31, 1931, totalled 4,137, Hon. Wesley A. Gordon, Minister of Immigration, told the House of Commons. The House was informed that the supply considering an item of \$1,905,000 for salaries and contingencies of the department. From April 1, 1930, to the present, deportations had amounted to 4,976, the minister said, of which 3,000 were British. The vote was divided between \$1,055,000 for salaries for the outside service, and \$850,000 contingencies.

The department was not now making grants to immigration societies, the minister added. The vote was divided between \$1,055,000 for salaries for the outside service, and \$850,000 contingencies.

Bill Was Defeated
Ottawa, Ont.—A bill to amend the Immigration Act, which would have permitted the deportation of a person who had lived in Canada for 10 years, was declared lost on second reading in the House of Commons when no one rose to address the House.

Mounties' Monument

Pioneer days in the Canadian West will be recalled on August 1, when notables from all parts of British Columbia and the Prairies gather at Fort Steele, B.C., on the Columbia Valley line of the Canadian Pacific Railway, to attend the formal unveiling of a cairn erected by the Historic Sites and Monuments Board, to commemorate the first Royal North West Mounted Police Fort in British Columbia. It was built in 1887 by Superintendent "Bart" Steele (afterwards Major-General Sir Samuel Benfield Steele, K.C.M.G., C.B., M.C.), with Inspectors E. T. Wood and G. F. A. Rust, Surgeon F. H. Powell and the men of "D" Division, and was an important factor in securing and maintaining the peace of the newly developed territory. The history of the Mounties is an epic and their work in connection with the construction of the line of the Canadian Pacific Railway to the Coast, is one of its most stirring pages.

Sporting Notes

Stony's champion boys basketball team has been invited to participate in the big sports day at Leduc next Wednesday, July 29th.

In the ball game Walter Ceague played on the Enos grounds on Sunday, the Enos team won by the score of 9 runs to 8. W. L. battery—E. Enders and E. Mayer.

The final meeting of all the committees arranging for the big sports day, in Stony on Wednesday met in the town hall on Monday night, with J. W. McCulla in the chair; the feature of the proceedings being the good showing of unanimity through the evening. The number of baseball teams competing was announced, and this arrangement was acquiesced in by those in attendance. The question of the basketball contests was also settled in a friendly manner.

The Male Quartet from the Lutheran College, Saskatoon, will give a concert Monday next, July 27, at St. Matthew Evangelical Lutheran church (Manitoba Synod). Program will consist of English and German folk songs, vocal and instrumental solos, and a play.

Spruce Grove News.

Mr. Robert Beuerlein has been nominated for delegate to the Wheat Pool from District "E."

The Grove's champion horse shoe pitchers, Messrs D. Brox and Carl Loeblich, from whom so much was expected in their contests at the Edm. Ex., did not get as far as the semi-finals, owing to a combination of unfortunate accidents.

Messrs W. A. Ries and W. Brox represented the Grove at the meeting at Winterburn last evening of the executive committee of the Intermediate Hall League which considered the cases of players barred from participating in the regular games.

The Dinkelhofer baseball team went up to Glory Hills on Sunday, and lost by the score 18—16.

Messrs Coffebeer and Nels Barnhardt motored to the City on Friday afternoon, to visit the Fair.

The big road making gang is at present down in Councillor Johnston's Division.

A very good piece of road work has been done on the 4-mile stretch at the School corner, north from the Baseline.

Old residents say that they never seen such a plentitude of weeds on the farms as show this season, owing to the heavy rains earlier in the summer. The weed Water Hemlock is particularly noticeable.

FASHION NOTE—"Scenty" has sold a hen and bought a hat.

The Government road repair gang has been fixing up the bad spots on the Baseline last week.

World's Grain Exhibition and Conference

Farmers Will Win \$210,750 in Prizes

The World's Grain Exhibition and Conference offers Canadian farmers an opportunity to share in cash prizes amounting to \$210,750.00. Competed in 50 competitive classes, open to the whole world, are 1,701 cash prizes. A few of the major awards follow:

\$2,500 a first prize for 50 pounds of wheat, 30 pounds of oats.
\$1,500 for 40 pounds of barley, 50 pounds of rye.
\$ 800 for 10 ears of corn.
\$ 300 for 30 pounds of peas, 30 pounds of barley, 30 pounds of clover.

With this splendid opportunity before them, Canadian farmers should keep a watchful eye on their growing crops. They should mark for special care those areas that appear most promising.

It should be understood that all seed and grain samples, if they are not already selected, will have to be taken in crops of this year. All exhibits must be received by the Exhibition authorities on or before March 1, 1932.

Of vital importance to the advancement of Canadian agriculture will be the winning of World Championships in 1932 by farmers of Canada. Their seed and grain exhibits must demonstrate to the world the quality of Canada's field crops.

Select the classes from the prize list most suited to the crop you grow, then select your samples from the best you have.

It is best to make your entry NOW.

Your sample for exhibit must be in the hands of the Secretary at Regina on or before March 1, 1932.

Valuable information relating to the preparation of grain and seed for exhibit may be secured by writing to the Secretary of the Provincial Committee, World's Grain Exhibition and Conference, care Department of Agriculture, your own province.

Show what you grow and share what you know

On application, the Secretary, World's Grain Exhibition and Conference, Imperial Bank Chambers, Regina, will send you prize lists, rules and regulations governing competitive entries and all other information.

CHAPTER XXIII.—Continued

He stopped abruptly, while Angela cried, her voice sounding unnatural, like some piece of machinery long unused: "What does that mean?"

"That we go with the drift," Myer said down beside his wife, and taking the child into his arms, rested his cheek tenderly against her hair.

Nick looked away, thinking: "I shall never hold Gay in my arms." His throat ached intolerably, and not caring who might see, he buried his face in his arms.

Yet, after what seemed an eternity of misery, his heart lightened. He had been right. The sea was calmer—even there in the cabin it was evident. Thank God the propeller had held out through the worst violence. "Perhaps now . . . if no fresh gale sweep them."

He dared not hope; yet with the coming of the wind died, as if spent by its own fury, and the rain came a steady downpour that fell like oil upon the troubled waters. After a long, almost breathless interval Nick looked at the Colonel, his eyes asking a question, and from the Colonel to Myer, who had risen unsteadily to his feet. The boat lurched and he stumbled—fell—but sprang up, and without a word went out, followed by Nick. When he returned he said, his voice harsh with feeling:

"The captain thinks the worst is over. If we're far enough out so that we strike no land until the water is less disturbed; and if we have the luck to drift into some safe harbor."

He finished the sentence unfinished, while across the cabin his wife's eyes met his.

The Colonel said: "Thank God!" and his voice shook.

Angela, sank back weakly, putting a hand over her trembling mouth; while from Amy Meyer, clasping her child closer, came a dry sob.

All day they drifted; yet, overcome with exhaustion, they also slept in snatches, and the hours passed, till, almost reluctantly, it seemed, the rain lessened—then ceased to fall. Slowly the clouds lifted, revealing a wild waste of restless sea. The day brightened; the waters grew more calm; and despite the fact that they were derelicts, drifting helplessly toward some perilous, hidden reef, hope sang in their hearts.

It was at dawn next day that Nick awakened suddenly from a heavy sleep. It seemed to him that the

boat shuddered, and then stood still. In an instant he was on deck; but the Myers and Colonel Nowell were there before him, gazing in rapture at a wooded island a half mile off. The "Sea Bird" had struck upon the bar, which held in it in a tenuous grip from which it was never to be dislodged; but already the men were preparing to leave a boat.

"Nobody spoke. No one seemed able to speak. The Colonel was plainly too moved for words. Amy was thinking with the exaltation of one surprised: 'My little Marjorie will live! She is going to live!'

Nick stood in a sort of trance. After that first enraptured moment he did not see the island, nor the palms, nor the dancing waves that looked angry no longer in the morning sunlight. He saw dimly, through tears of which he was unashamed, the little young figure clad in a khaki middie, a crimson tan upon her head, a crimson sweater on her arm, a bundle on a stick across her shoulder."

It was Angela who broke into upon this vision. She approached quietly, the only member of the party who thought of restraint. Her gown rivaled the blueness of the sea, and of her own eyes.

"Well, that looks something like!" Her voice jarred on the atmosphere like a discordant note. "I suppose we're in some horrible of the way spot. Why on earth couldn't we have struck a place where we'd be picked up within a week? I detest camping."

"The spell that had held them all was broken. Everyone looked at her in amazement, even the captain who was approaching to speak to Myer. Their eyes were shocked—indignant, but Angela was unaware. She said, addressing the captain, in a manner that was a bit arrogant: 'I shall never hold Gay in my arms.'"

"The captain's eyes met hers, and at something in their depths her own eyes dropped. He had followed the sea for many years—encountered danger without flinching, many times; but not often had he been called upon to live through hours like those that had just passed. He was a plain man, a man of speech, perhaps, but deeply religious; at heart, as are most men who have met death face to face. His eyes left Angela's to drink of the scene before them: the rippling water—the clear sky—the fairy island set like a jewel amid the blue."

"God-forsaken!" he said. His eyes came back to hers and hardened like steel.

"But for His goodness, Madam," he added grimly, "you would now be food for the sharks. You should be on your knees."

CHAPTER XXIV.

Halfday had been gone three weeks. "Remember," he said to Simon, "that had news travels faster than good. If you hear nothing it will be because there is nothing to hear. Should I get any sort of clue I will send a message. I shall stop everywhere, inquire where there is anything to inquire of, and explore every island. I haven't the dimmest idea how long it will take; but I shall leave nothing un- done. I know you will do your best to keep up Mrs. Hastings' courage; and I know, too, how much harder a task you have before you than have I."

Three weeks, and no word of any kind. "It seems three years," said Gay; then closed her lips as if ashamed to have admitted even as much as that. There was a fragility in her face these days that frightened Simon; a look of waiting that was sadder than any tears. The doctor saw it, too.

"Gay, dear child," he said on leaving her one day, "you are going through a terrible experience. Tears won't hurt you, you know. Sometimes they heal. Why don't you cry?"

She smiled at him wistfully. "I'm afraid to. When I cry, Dr. Bennett, I cry so dreadfully. After the baby comes, if—it there's no news of Nick—I'll let myself go. I don't dare, to now. It would make me ill. You've never seen me cry, Dr. Bennett, or you'd understand."

"But I could cry myself when I look at her," the doctor confessed to Mary, who was at the bedside. "She's the bravest woman I ever saw, and I've seen many. To hear her talk so calmly about her father, to those little boys—as if he had—well, just stepped out for a moment and would be right back—God bless him. I don't see how old Simeon Bartlett stands it!"

"He stands it because he's something of a hero; but he has aged shockingly. Is there anything more that we can do for them?"

He answered with a hopeless gesture. "You can drop in every day and appear cheerful. I wish Gay had a mother; but there I guess you're not a bad substitute, Mrs. Maxwell."

Mary smiled, and said: "We sent for Janey. I think it will do Gay good to see her. They're such close friends, and Janey's always so optimistic. She's like a breath of mountain air. She wrote me the other day that she 'felt in her bones' that Nick was coming back; and if she can instill that feeling into Gay it may help."

"Good!" said the doctor heartily. "Janey's a tonic. I always said she grained at me when she was bored. It was about a week after this conversation took place, that, thousands of miles away on a coral-tipped island, Nick faced one of the blackest moments of his life. He had gone a tramp, Angela complained that he was always tramping."

"Why not?" he answered. "Someone must patrol this island. Who knows from what side a boat might appear at any time?"

"You might at least ask for company," she pouted. "I don't want company," he replied bluntly. He was a little weary of the "injured innocence" appeal. "Please, I can't take you because you've got tired by half a mile of it, and I'm going farther. I think that point of land off to the south would be a good place to build a signal fire."

"But you've already built dozens! When you're not building them you're making plans for starting out with the captain in a small boat. It's absurd. If any lives are to be risked it shall be the lives of those common machinists." Besides, if the captain were any good he'd know where we are."

"Look here," said Nick a bit petulantly, "haven't I explained a dozen times that a man might live on the high seas all his life, and still know very little about these islands? They're off the main line of ocean travel. He knows our latitude and longitude, of course, but you can't depend on the smaller islands; and we're not sure how far off the next one may be. Our food won't last forever, Angela, though waters' a far more serious problem. You sneer at the captain because he's a machine."

"Is he your sort?" she broke in angrily.

(To Be Continued.)

Asthma Brings Misery, but Dr. J. D. Kellogg's Asthma Remedy will replace the misery with welcome relief. Inhaled as smoke or vapor it reaches the very innermost recesses of the bronchial passages and soothes them. Restriction passes and easy breathing returns. If you know as well how this remedy would help you as do thousands of grateful users, there would be a package in your home tonight. Try it.

Depth Tester For Aviators

Also Records Approach Of Ships In Misty Weather

A depth-testing device which shows how much water is below a ship at sea by a dial on the bridge has been described in a London newspaper. Now comes news of similar device for aeroplanes which not only shows by the hand on a dial the height of the aircraft in the air, but the approach of hills and mountains in misty weather. It is called, a sonic, or sounding altimeter, and besides indicating the height on a dial it emits a shrill whistle.

Aching CORNS STOP HURTING

INSTANT RELIEF!

Just a drop or two of Putnam's Corn Extractor will pain the pain away. Relief is almost instantaneous. Removing corns with Putnam's, so easy, so sure, so safe, so quick, and so pleasant, this wonderful remedy is the best. Putnam's Corn Extractor is a sure relief for sore corns. So it is every drop for sore corns. So it is every drop for sore corns.

PUTNAM'S

The ADVENTURES of CAPTAIN JIMMY and his Dog SCOTTIE

WHAT CAME BEFORE? After many adventures living over China, Captain Jimmy had returned to his home in the enemy's lines. He plans a raid on the military camp to secure gasoline and oil.

While Lieutenant Stone throes the military camp into an uproar, I whistled softly to Scottie and groped my way through the darkness toward the blue, imposing tent.

Quietly I slipped under the canvas, and felt my way quietly around the sides. As my eyes grew more used to the darkness, I could see the outlines of a large cot on which someone lay sleeping soundly.

Scarcely daring to breathe, I crept slowly forward. Then before the surprised Chinese could utter any remark, I snatched a bag of rice and secured his arms behind his back.

Under my hand I discovered no less than two pistols and a knife. The knife I wrapped in a blanket. I shoved my captive under the tent wall, and followed him before to where the horses were held by Fu Sau.

The interpreter translated my message. General said he can do. The general said he can do. The general said he can do. The general said he can do.

Little Helps For This Week

"Seekest thou great things? Seek them not."—Jeremiah xlv. 5.

Daily struggling, though unloved and lonely. Every day a rich reward will give; Thou wilt find by hearty striving only. And truly loving, thou canst truly live.

—Harriet Winslow.

We need not go through the days of our life seeking our work. God places it within our hands. And yet how often do we make the mistake of asking for a life which shall, in its form and outward course, be more spiritual and divine than that which we are obliged to live. Million occasions will come in the ordinary path of life, in your houses and by your firesides, wherein you may act as nobly as if all your lives you visited beds of sickness and pain,—occasions varying every hour, in which you may restrain your passions, subdue your hearts to gentleness and patience, resign your own interests for another's advantage, speak words of kindness and wisdom, raise the fallen, cheer the fainting in spirit, and soften or assuage the bitterness and weariness of the mortal lot. These acts are written in the secret book of the great account.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

Coal Survey

Province Of Saskatchewan Making Survey Of Coal and Clay Deposits

Under instructions from the Provincial Department of Railways, Labor and Industries, a survey of coal and clay deposits lying north of the Saskatchewan River is being conducted by Professor W. G. Worcester of the Ceramics Department of the University of Saskatchewan and Walter Hastings, developing engineer. For some time these deposits have been known to exist but they have never been thoroughly investigated as to their quality or commercial value.

What's that stuff on those sheep?—Suspicious Old Lady (on the farm).

What's that stuff on those sheep?—Suspicious Old Lady (on the farm).

poor Chinese looked so funny in his night clothes and blanket, yet he just could not be made to move. So much little out of his mind made a number of horrible things that would certainly happen to him if he continued to refuse our request.

Being a sensible man, and a General he decided to yield handsomely since he must. "He said, 'Yes,' he can do," translated Fu Sau. "Very glad. So much little favor for fine gentlemen."

At daybreak I rode out to the camp with the General's written order in my pocket, and his gold signet ring on my finger, as proof of my authority.

The camp was quiet and immediately we were sighted a group of mounted men galloped out and surrounded us. In a loud and commanding tone I insisted that we be taken at once to the commanding officer. To him I showed the ring and made the demands for gas, oil and food.

We got plenty of immediate action. Barrels were loaded with gas, oil and food and we set out for camp. Leading off in a round about way, it was over four hours before we shook off the last of our soldier and finally reached the "plane."

For us, the timed food was a real feast and even the General seemed to enjoy it. But fast over, we found him to be a very good cook.

NOTE—Any of our young readers writing to "Captain Jimmy" at 210 St. Hilg, Toronto, will receive his signed photo free.

THE RHYMING OPTIMIST

By Aline Michaels

YESTERDAY

What is yesterday, my Dear? Just a shadow leaving; Worth no tribute of a tear, Worth no moments grieving.

Bave hearts thrust aside the past, Or craves or gold it brought them; Flinging all away at last, Save the truth it taught them.

What is yesterday, my Sweet? Just an echo going Down a bare, untried street Where no life is flowing.

Leave it as a brave heart must With no thought of sorrow; Putting all your faith and trust In a glad tomorrow.

Oalo, Norway, is to have sky-scrapers.

Thanks for Them Kind Words

That Stony has a basketball team of boys worth talking about, is amply proven by the good showing they made in the contests at the Edm. Ex. by fighting their way to the finals and overcoming teams which formerly looked to be their superiors. The "good word for earnest effort" that the sports writer in Edmonton Journal gives them is well deserved. The Journal says: "Completing one of the greatest basketball tournaments ever held in the Dominion, the final game of the senior boys' division was fought out between Stony Plain and Shandro entries, and the figures read in favor of the Shandro team at the end of the tussle. The result reflects much credit to the playing ability of the winning team, while the losers also deserve a good word for earnest effort at all times. Both teams had some real opposition in early games in the respective draws and distinctly learned the privilege of reaching the final."

Stony's team: P. Enders, L. & E. Goebel, W. McLean, G. & A. Graden, L. Oatway, E. Enders, J. Unterschuetz, D. M. Moyer.

Accident on Baselines

On Saturday afternoon last, while a car driven by a City lady was passing the Hilaire Heber farm, a sudden lurch turned it off the grade. The car bumped into the fence, came to a standstill and appeared to crumple up. Mr. Philip Schram and Mr. Sutherland, both from Spruce Grove, were the first to come on the scene with their cars.

With the driver in the wrecked car were 3 children and a Mrs. Armstrong. The latter lady received what appeared to be serious injury, and was taken back to the City, to a hospital.

Duffield Doings.

The Duffield Women's Institute intend holding their annual picnic on Thursday, July 30. Members are invited to bring a friend. This will be a basket picnic, and will be held at Kapasswin Beach. The Duffield W. I. will be met there by the members of Wabamun W. I., and a joint picnic will be held. There will be races for the younger set, and appropriate prizes given the winners. A big attendance is expected.

There will be a barn dance on Friday Evg. July 31st, at Mr. Coates' farm, at Rose Valley, at which Barth's Orchestra will supply the music.

The Duffield ball team engaged the team from Winterburn on the local diamond on Sunday afternoon, when the locals defeated the visitors by 18 runs to 7. The game was not as peppy as was expected owing to all the Winty team not being present. Batteries: Duffield, Mitchell, Hellum & Brass; Winty, Moore & Don Bevington.

Golden Spike

The dance in the new barn of Mr. Schuster Senior last Friday evening was a huge success, the barn being filled with dancers and onlookers.

A Missionfest was held at Zion Lutheran church (Missouri Synod) on Sunday last, at which a very able discourse was given. The weather being fine, there was a large attendance.

Edmonton Beach.

"The big day of the season," was Mr. Barrie's description of Sunday at his Beach. Such a large number of motor cars was never before seen here. With hundreds in bathing, and hundreds of others taking advantage of the cool shade, the Beach was a very lively place all day.

Stony Plain is well represented at the big swarm of tents here, there and everywhere on the grounds; practically all the young men from the town being present.

The Wednesday and Saturday evening dances given by Martin's orchestra continue to draw a large attendance.

Mr. Barrie made a sale of several lots last week.

Mr. Geo. Bryan motored a party of friends; out from the City, on Sunday, to the Beach, to take advantage of the cool breezes.

The date of the big U.F.A. picnic to be held at Edmonton Beach will shortly be announced.

RIDING IN THE CLOUDS

The picture shows a typical trail ride, camp scene, fording a river, and the starting type of cowboy, who is guide, friend and counselor to the disciples of the saddle.

Up, out and away from the cares and limitations of modern life; sharing the joys of long days in the saddle in flower-studded Alplands and stately passes with a goodly company of kindred spirits; happy evenings round the campfires and restful, health-giving nights in the wine-like atmosphere of the mountains; such is the life of the Trail Riders of the Canadian Rockies, on their annual expeditions from Banff and Lake Louise, which have long since become famous items in the summer programme of the two great Canadian Pacific Rail-

way hotels at these renowned holiday places. Carefully planned all comers; experienced guides, cooks and horse-wranglers; a pack train always ahead to welcome the riders at the evening meal, with the night's camp all ready for occupation; horses that are as sure-footed as goats all contribute to making this form of holiday one of the most original and enjoyable on the American continent. Canadian Pacific lines carry enthusiasts and new recruits from the four corners of the earth to Banff and Lake Louise, each summer. This year the official four-day ride

will be held from July 30 to August 2, covering 62 miles through Banff National Park, in territory with special appeal to the photographer and fisherman, and will be followed by a 10-day ride of greater mileage.

Wheat Pool Members Now Have an Option.

Modification of their contracts to permit members of Alberta wheat pool to sell their 1931 and 1932 crops on the open market with the option of delivering to the Pool and accepting the prevailing initial payment, is now in force. Every Pool member will be given the option—

1. Of delivering his wheat on Pool basis, taking initial payment and participating in future payments, or

2. Of disposing of his grain under any method provided under the Grain Act, obtaining full current market price for same. Any portion of a member's grain may be pooled or any portion sold outright for cash.

Pool members are at liberty to select either of the above mentioned options for the disposal of any portion of their 1930 crop which has not already been marketed, as well as for the new crop.

Track Meet for Ladies.

The National Track & Field Championships of Women's Amateur Athletic Federation of Canada will be one of the features of the sports meet at Wetsaskiwin Aug. 11 and 12, held under the patronage of Lieut.-Gov. Walsh and Mrs. Walsh.

Contestants from various points between the Pacific Coast and far eastern Canada will participate. This is a good opportunity for youthful Albertans, at minimum expense, to compete for the Canadian championships.

At the same time and place the Provincial Junior Track & Field championships, sanctioned by Alberta branch of A.A.U.C., will be conducted.

The affair is under the auspices of Wetsaskiwin Ladies' Amateur Athletic club and the Wetsaskiwin Sports association.
